

Cardiorespiratory module - Batch 26

Tutorial – Thrombosis and Embolism

Date	Time	Group	Venue
07.06.2018	2.15 – 3.15 pm	Group A	Tute room A20-003
	3.15 – 4.15 pm	Group B	Tute room A20-003
08.06.2018	2.15 – 3.15 pm	Group C	Tute room A20-003
	3.15 – 4.15 pm	Group D	Tute room A20-003

Explain the pathophysiological basis of thrombosis and embolism in the following clinical settings.

1. A 40 year old man with multiple fractures following a road traffic accident.
2. A 70 year old woman with disseminated adenocarcinoma of the stomach.
3. A 45 year old obese diabetic woman on oral contraceptives.
4. A 30 year old woman following a prolonged labour.

Please note , when attending the tutorial, each student should bring the written answers for all four cases given above.
